

CINTYA HUAIRE

Digital Innovation & AI Automation Officer | Data Systems | International Development

edithuaire@gmail.com | +356 79655302 | [GitHub](#) | [LinkedIn](#) | Malta (internationally mobile)

PROFESSIONAL SUMMARY

Digital innovation professional with 7+ years of experience contributing to the design and delivery of AI-enabled solutions, automation workflows, and data platforms across international development programmes. Currently supporting modernisation activities at ICMPD across Mediterranean regional portfolios, including operational delivery for field offices in Jordan, Lebanon, Libya and Tunisia. Track record of building and deploying dashboards, LLM-based tools, multi-agent automation systems, and knowledge management platforms that improve efficiency, consistency, and evidence-based decision-making in complex, multi-stakeholder environments. Experienced in translating project requirements into structured tasks, SOPs, and deliverables, and in supporting coordination with technical experts and service providers to ensure quality and timely execution.

CORE COMPETENCIES

AI-enabled Solutions & LLM Tools	Automation Workflows (n8n, Power Automate)	Power BI Dashboards (DAX, Power Query)
Operational Coordination & Tracking	SOPs & Structured Documentation	Knowledge Systems & Digital Delivery
Quality Assurance & Output Review	Multi-stakeholder Coordination	R Shiny Python SQL STATA QGIS
Budget & Financial Performance Tracking	M&E & Results-Based Management	Data Storytelling & Stakeholder Communication

PROFESSIONAL EXPERIENCE

International Centre for Migration Policy Development | *JPO Modernisation* | Sept 2024 – Present | Valletta, Malta

Contributes to operational coordination and delivery of AI-enabled and digital modernisation activities across Mediterranean regional portfolios (MCP Algeria, BMPM, MIDAM), working in coordination with the Modernisation Officer.

- Built and maintains Power BI dashboards for the Mediterranean portfolio, including the MIDAM and MCP Algeria capacity development dashboards and the MED TI dashboard integrating 12+ data sources with advanced DAX and role-level security, producing operational and executive-level views for donor reporting and project decision-making, and contributed a SharePoint-based data entry workflow with embedded validation rules reducing entry errors and feeding directly into reporting views
- Supported the development of a procurement tracking dashboard for BMPM consolidating actuals, commitments, and budget execution in near real time
- Currently piloting a budget planning application for CAP Algeria (R Shiny), replacing manual spreadsheet-based planning with a structured, auditable tool supporting multi-line expenditure forecasting, variance tracking, and scenario modelling
- Developed the MIDAM project web page on SharePoint, combining a data storytelling narrative with embedded Power BI dashboards, applying information architecture judgment on where visualisation must be complemented by structured narrative for effective donor and stakeholder communication
- Designed Power Automate and n8n automation workflows reducing reporting time by 10–15% and decision-making turnaround by 25%; developed SOPs and process documentation to ensure continuity and consistency in digital delivery across the portfolio
- Supported AI tool evaluation including cost-benefit analysis of CAT solutions and Articulate 360 instructional design review for AI literacy microcourses; provided coordination and follow-up support across expert and service provider engagements, contributing to tasking, deliverable tracking, and output review against project requirements
- Developed and maintains GPT-based AI tools: a TOR Drafter Bot (MCP Algeria) generating procurement-compliant expert contracts; a TI Dashboard Guide Bot providing conversational support for the Training Institute dashboard; and an MDC Bot Router that dynamically directs users to the right tool based on conditions, integrating GPT citations and a living knowledge base linked to a real-time spreadsheet

ILO – International Labour Organization | *Research and Data Intern, Fundamental Principles and Rights at Work* | Feb 2024 – Aug 2024 | Geneva, Switzerland

Contributed to three parallel research and data workstreams under the FPRW Branch, spanning geospatial analysis, statistical research, and supply chain risk assessment across Mexico, Turkmenistan, and Canada.

- Contributed as core team member to a published ILO factsheet on child labour in Chiapas, Mexico (AccioNNAr / U.S. DOL): ran STATA-based statistical calculations on ENTI 2022 household survey data, co-wrote the analytical narrative, and contributed to questionnaire design for supplementary data collection instruments; output was published externally as an official ILO product
- Supported forced labour risk mapping in Turkmenistan's cotton sector as part of a 3-person team: used Google Earth Engine to locate and allocate geographic coordinates for cotton cultivation areas, mapping field locations to support evidence on labour practices in agricultural supply chains
- Contributed to a Tableau-based supply chain risk assessment exploring forced labour exposure in products imported from Canada: supported data structuring, geographic mapping of supply chain nodes, and visualisation of risk indicators to inform potential policy recommendations

UNICEF – Latin America and the Caribbean Regional Office (LACRO) | *Social Policy and Data Intern* | Oct 2022 – Jul 2023 | Panama City (Remote)

Supported the Social Policy team in evidence generation, data systematisation, and knowledge communication across 18 LAC countries, with a focus on care systems and disability-inclusive policy.

- Systematised multi-country social policy data and contributed analytical inputs to a regional technical paper on care systems, coordinating data collection with 15+ country offices and developing structured templates to improve cross-country consistency in reporting
- Designed and produced infographics for two technical webinars using Adobe Illustrator, translating complex policy findings into accessible visual summaries; produced accompanying technical graphs in R; webinars covered the impact of disabilities on childcare and the architecture of LAC care systems, reaching practitioners across government, civil society, and international organisations
- Developed M&E knowledge-sharing tools and data newsletters to support regional teams in tracking social policy commitments and communicating evidence across the UNICEF LACRO network

Ministry of Housing, Construction and Sanitation, Peru | *Public Policy Consultant, Territorial Analysis* | Jan 2021 – Jul 2021 | Lima, Peru

Contributed to a national territorial analysis programme assessing the relationship between population distribution, service access, and rural development needs across Peru's 94,922 populated centres.

- Processed and systematised socioeconomic indicators for 94,922 populated centres across Peru using STATA for statistical computation and QGIS for map-based visualisation, producing geospatial models informing equitable resource allocation policy for 8M+ rural inhabitants
- Co-authored two technical reports on territorial planning and the impact on rural service delivery, covering access gaps in education, health, water, and sanitation, submitted to regional governments and national ministry planners and subsequently adopted as national guidelines for territorial occupation analysis
- Coordinated with senior policy advisors and regional government counterparts to validate methodology and ensure analytical outputs were actionable for planning decisions at subnational level

Ministry of Economy and Finance, Peru | *Economic and Data Consultant, Public Financial Management* | Feb 2020 – Dec 2020 | Lima, Peru

International technical assistance consultancy contracted through HELVETAS Swiss Intercooperation to support the ST-AFSP (Secretariat of the Public Sector Financial Administration Committee) at Peru's Ministry of Economy and Finance, within a Swiss development cooperation programme to strengthen integration across eight national financial management systems.

- Produced weekly policy memos and analytical reports for senior decision-makers at the Vice-Ministry of Finance, synthesising data from transport and telecommunications sector projects and translating complex financial execution findings into actionable insights; outputs formally approved by the Unit of Studies and Coordination of Reform
- Redesigned a Tableau monitoring dashboard to track budget execution and project performance across the national transportation and communications portfolio (USD 2.56M), standardising reporting protocols across 15 government units and significantly improving data consistency and executive-level visibility across the sector
- Contributed to data analysis for ST-AFSP's process improvement programme, identifying integration gaps across eight administrative financial systems (Public Investment, Debt Management, Accounting, Supply, Budget, Treasury, and Human Resources) and producing evidence-based inputs for institutional reform recommendations
- Collaborated with IMF technical consultants on an institutional reform assessment under Peru's Treasury System modernisation programme, supporting analytical documentation and contributing to written outputs submitted to senior government stakeholders

Ministry of Education, Peru | *Economic and M&E Consultant* | Feb 2018 – Jan 2020 | Lima, Peru

Contributed to the design and national scaling of Mi Mantenimiento, a government digital programme managing infrastructure maintenance funding for 54,000+ public schools across Peru.

- Contributed to the design and implementation of Mi Mantenimiento, a digital platform guiding school principals in managing infrastructure maintenance budgets, co-leading user trials with principals and teachers and contributing to indicator logic and process design; the programme received the 2019 Good Practices in Public Management Award (Ciudadanos al Día) and was adopted as national policy
- Supported TOR drafting for local-level vendors supplying educational materials to public schools, contributing to technical specifications, scope definitions, and contract documentation as part of the Ministry's procurement processes
- Developed a data-driven allocation methodology for a USD 101M cash-transfer programme covering 50,000+ schools, incorporating predictive modelling that improved budget execution compliance by 15%
- Built performance indicators and digital monitoring tools embedded in the programme platform, enhancing operational efficiency by 25% and ensuring 98% of schools in Lima Metropolitan Region met budget execution deadlines

Metis Gaia S.A.C | Junior Analyst | May 2017 – Dec 2017 | Lima, Peru

- Conducted qualitative and quantitative analysis using STATA and Excel on mining impact projects involving 3,000+ community members and managed IRB protocol compliance, survey programming (SurveyCTO), and data cleaning workflows
- Planned, supervised, and conducted fieldwork in rural areas for mining company Chinalco, developing culturally appropriate survey instruments and training 8 field enumerators

EDUCATION

MIT – Massachusetts Institute of Technology | *MicroMasters: Data, Economics and Design of Policy (DEDP)* | Sep 2024 – Dec 2025 | Online

Graduate-level programme covering advanced econometrics, causal inference, randomised control trials, impact evaluation, and development finance. Applied Python and R throughout for policy evaluation exercises, statistical modelling, and programme design analysis.

Hertie School of Governance | *Master of Public Policy (MPP)* | Aug 2021 – Jun 2023 | Berlin, Germany

Specialisation in data and evidence-based policy design. Thesis: Impact of Women's Political Participation on Progressive Care Policies in Latin America and the Caribbean, panel data analysis, machine learning, Python and R.

Universidad del Pacífico | *Bachelor of Economics* | Mar 2012 – Sep 2018 | Lima, Peru

Quantitative economics training including econometrics, microeconomics, public finance, and economic geography.

PUBLICATIONS & RESEARCH CONTRIBUTIONS

Peer-reviewed Articles & Book Chapters

- Huaire Huaynalaya, C. (Sep 2025). Indigenous Digital Self-Determination. In: AI Multipolarity: People. Peace. Planet (pp. 34–35). Contributing chapter examining how indigenous communities can assert governance rights over AI systems affecting their territories and knowledge systems
- Prieto Espinoza, G., Torero Gamero, D. A., Rondón Ramirez, G. A., & Huaire Huaynalaya, C. E. (2021). Nuevas herramientas para analizar la ocupación del territorio peruano. *Espacio y Desarrollo*, No. 38, pp. 29–60. PUCP. Peer-reviewed. Geospatial and quantitative analysis of territorial occupation patterns in rural Peru using R, STATA, and QGIS

Research Reports & Institutional Publications

- Huaire Huaynalaya, C. (2025). Impact of AI and Digitalisation on Indigenous Communities. Global Youth AI Advisory Body (GYAAB). Main author of the report examining AI-driven risks and opportunities for indigenous communities globally, with policy recommendations for multilateral AI governance frameworks
- ILO / U.S. Department of Labor (2024). Child Labour in Chiapas, Mexico: Evidence from ENTI 2022. AccioNNAr Programme. Core team member: STATA-based data analysis, questionnaire design contributions, and co-author of factsheet narrative; published externally as an official ILO product
- Huaire Huaynalaya, C., et al. (2023). Forging a Just Transition: Towards Green Jobs and Rights-Based Futures (pp. 169–217). 61st UN Graduate Study Programme Report, UN Geneva. Contributing author on labour rights, green economy transitions, and policy frameworks for LAC countries
- Ministry of Housing, Construction and Sanitation, Peru (2021). Two technical reports on territorial planning and rural service delivery impact. Co-author responsible for geospatial modelling, socioeconomic indicator systematisation, and methodology documentation; adopted as national-level guidelines

CERTIFICATIONS & PROFESSIONAL TRAINING

- AI in Governance — ITU International Telecommunication Union | 2026
- Women in Digital Government Fellowship (2026 Mentee) — GovStack / ITU / World Bank | Ongoing
- SQL for Data Science — IBM via edX | Nov 2025 – Jan 2026
- Documenting Development Data Using Metadata Standards — World Bank | 2025
- The Challenges of Global Poverty — MIT via edX | 2024

AWARDS, RECOGNITIONS & PROFESSIONAL MEMBERSHIPS

Competitive Awards & Recognitions

- 2026 Mentee — Women in Digital Government Fellowship | GovStack / ITU / EU (competitive international selection)
- 2025 Selected Participant — UN Open Source Week | United Nations
- 2019 Good Practices in Public Management Award — Mi Mantenimiento programme | Ciudadanos al Día, Peru
- 2017 Winning Team — UNDP SDG Hackathon (KILLKI project) | UNDP / UTEC

Advisory Bodies & Professional Networks

- Member — Global Youth AI Advisory Body (GYAAB) | 2024 – Present
- Delegate — World Bank Youth Summit Network | 2025
- Fellow — 61st UN Graduate Study Programme Alumni | 2023

ADDITIONAL INVOLVEMENTS & VOLUNTEERING

180 Degrees Consulting Berlin e.V. | *Consulting Director, Executive Team (Volunteer)* | Aug 2023 – Mar 2024 | Berlin, Germany

180DC is the world's largest university-based social impact consultancy (33 countries, 500+ clients). Selected competitively from an international applicant pool for the Executive Team, managing two teams of five student consultants each.

- Supervised two consulting teams across project cycles for non-profit and social enterprise clients, overseeing quality of deliverables and providing guidance on research methodology, digital tools, and professional communication standards
- Contributed to client and mentor selection, relationship management, and team-partner matching; moderated Mentor Panels and programme events; supported conflict resolution and stakeholder coordination across consultants, mentors, and project partners

INDECOPI – National Institute for the Defence of Competition and Intellectual Property | *Socioeconomic Consultant* | Oct 2020 – Dec 2020 | Lima, Peru

Project-based engagement providing socioeconomic analysis and indicator development to support evidence-based policy reform.

- Conducted in-depth research and analysis on challenges in intellectual property rights enforcement in Peru, identifying systemic bottlenecks and developing actionable policy recommendations in collaboration with INDECOPI's legal and policy teams
- Developed socioeconomic indicators and monitoring tools to track enforcement performance and process efficiency; co-authored a strategic proposal to streamline administrative procedures, contributing to an estimated 20% reduction in processing times for IP infringement cases
